

COMPOUNDING WITHOUT
COMPROMISE SINCE 1962

The Medical-Industrial Complex

Arden Andersen *DO, MSPH, PhD, Colonel USAF(ret)*

We live in interesting times and it seems we merely repeat history over and over again because we fail to heed its lessons. Our country was established because our founding fathers were sick and tired of imperialist control over every aspect of their lives, taxation without representation, and governmental corruption. Not much has changed, considering we seem to have corrupt politicians at every level from local to federal government. Some will say this is the end of times, a statement I have heard for more than 60 years. The world ends every day for someone. Unfortunately, there is an uptick in how many people are meeting their maker these days, thanks greatly to “our” government which has become more of a mouthpiece for the medical and military industrial complexes than a representation of the American public.

A recent article in the British Journal of Medicine titled “Excess mortality across countries in the Western World since the COVID-19 pandemic: ‘Our World in Data’ estimates of January 2020 to December 2022” is definitely an “I told you so” revelation. <https://doi.org/10.1136/bmjph-2023-000282>. Per the article, “The total number of excess deaths in 47 countries of the Western World was 3,098,456 from 1 January 2020 until 31 December 2022.” In other words, there were over 3 million MORE deaths than would be expected based upon long term mortality trends for these 47 countries. These deaths are not associated with wars, violence, natural disasters, COVID-19 infection, and so forth.

“Excess mortality was documented in 41 countries (87%) in 2020, 42 countries (89%) in 2021, and 43 countries (91%) in 2022. In 2020, the year of the COVID-19 pandemic onset and implementation of containment measures, records present 1,033,122 excess

deaths. In 2021, the year in which both containment measures (masking, social distancing, lock downs) and COVID-19 vaccines were used to address virus spread and infection, the highest number of excess deaths was reported: 1,256,942 excess deaths. In 2022, when most containment measures were lifted and COVID-19 vaccines were continued, preliminary data present 808,392 excess deaths.” (Associating the COVID-19 vax itself with excess deaths.)

This study follows an even more indicting study published in the February edition of the journal Frontiers In Immunology, “Brief research report: impact of vaccination on antibody responses and mortality from severe COVID-19” <https://doi.org/10.3389/fimmu.2024.1325243>. Their results showed that COVID-19 vaxed people died at TWICE the rate as did unvaxed people. So much for “get your booster shots.”

Another study, “SARS-CoV-2 Spike impairs DNA damage repair and inhibits V(D)J recombination in vitro” out of Sweden showed how the COVID-19 vaccine can increase the risk of breast and ovarian cancers. So damning was this paper that it was subsequently retracted, NOT BECAUSE OF SCIENTIFIC FAULT, but because of political pressure from the pharmaceutical industry. Documents obtained via the Freedom of Information Act are not yet complete, but already demonstrate a trail of corruption and coercion in getting the paper rejected. Further, the lead author, Ya-Fang Mei, who refused to agree to the retraction, has mysteriously come up missing.

Everything that Lisa Everett Andersen wrote about and predicted in her Lakeview Area News (out of Lansing, MI) article from a year ago has come to pass. Everything that I wrote about 2 years ago regarding COVID-19, the vax, and public health has come to pass. Study after

study from around the world now repeatedly verify ours' and others' predictions. This is not to boast, but to show that when we follow the actual and unbiased science trail, not the skewed "science" spit out by the pharmaceutical industry and repeated by the undiscerning, the truth is revealed.

Unfortunately, we still have those who, like automatons, continue repeating the "Fauci mantra." This is a man who, evidenced by the recent Congressional hearings, lied repeatedly about most every detail of the COVID pandemic. Everything he promoted - from masking to "social distancing" to repeated vaccination to denying NIH funding, involvement, and profiting from the developed COVID-19 shots - contains lies. I suggest one read the book, *The Real Anthony Fauci* and also see the documentary by the same name, both of which are well authenticated and referenced.

NIH and its researchers, funded by our taxes, profited directly, individually, and collectively through royalty payments from various vaccine manufacturers. As the reader will recall, I called out Scott Gottlieb, MD, who was Trump's appointed FDA director (after a \$1 million donation from Pfizer), as he was the one who directed the fast-tracking of the COVID vaccines and worked to block any and all alternatives including ivermectin, hydroxy-chloroquine, hyperbaric oxygen therapy, and nutritional protocols. Gottlieb came from Big Pharma and today is on the board of directors for Pfizer Pharmaceuticals.

I fully agree with Senator Roger Marshall's legislative proposal to prevent government employed researchers from taking private industry jobs for 5 years after their "retirement" from government service. That would include military officers who regularly move from the Pentagon to defense contractors employment.

Recently, the Federal courts became involved in the COVID vax debate because people who were harmed by the nonsense are finally fighting back against the tyranny.

"The 9th Circuit Federal Court of Appeals just concurred that mandating COVID-19 'vaccines' violates the individual human rights of teachers and other staff of the Los Angeles School Unified District (LAUSD), remanding a lower court's dismissal of their case against the LA County School District's vaccine mandate for employees."

The 9th Circuit recognized that the COVID-19 shots were/are not legally "vaccines." The court held that '[t]his misapplies Jacobson,' which 'did not involve a claim in which the compelled vaccine was 'designed to reduce symptoms in the infected vaccine recipient rather than to prevent transmission and infection.' Jacobson does not, the majority concluded, extend to 'forced medical treatment' for the benefit of the recipient."

An article published in February 2024 titled, "Are COVID-19 mRNA vaccine side effects severe enough to cause missed work?" 10.1097/MD.00000000000028839 revealed a cross-sectional study of health care-associated workers in which "Over one-third of recipients of either of the 2 COVID-19 mRNA vaccines (Pfizer-BionTech and Moderna) experienced adverse events that were severe enough to cause them to either miss work or wish they would have."

The deceit, outright lies, and coercion perpetrated by our government entities and the pharmaceutical industry in this matter are not going unnoticed, as Kansas now joins Texas and, soon to be announced, 5 other states (including Idaho) in filing suit against Pfizer for false and misleading advertising campaigns regarding COVID-19 mRNA vaccines as well as lack of informed consent and full disclosure of the risks of the shots. <https://kansasreflector.com/2024/06/17/kansas-ag-kobach-accuses-pfizer-of-misleading-vaccine-marketing-in-lawsuit/>

COVID-19 vaccination findings, as we predicted from the mRNA vax inception, are not unexpected nor novel. There are repeated studies regarding vaccinations in general showing that vaccinated children have more asthma, more allergies, more upper respiratory infections, more eczema, and more doctor visits than do unvaccinated children. The following are two studies along these lines.

"Relative incidence of office visits and cumulative rates of billed diagnoses along the axis of vaccination" was retracted after pressure from the Washington Board of Medicine, which suspended researcher and pediatrician Dr. Paul Thomas' license for spreading "misinformation." There was no scientific basis for the retraction and no proof of misinformation. In fact, a followup study,

“Revisiting excess diagnoses of illnesses and conditions in children whose parents provided informed permission to vaccinate them” <https://doi.org/10.56098/ijvtr.v2i2.59>, published in 2022, verified Dr. Thomas’s original findings and publication.

Another study is out of Guinea-Bissau, with a meta-analysis published in 2018 from an unintentional study done in 1991 of vaccinated vs. unvaccinated poverty-stricken African children with DPT and oral polio. (“Evidence of increase in mortality after the introduction of diphtheria-tetanus-pertussis vaccine to children aged 6-35 months in Guinea-Bissau: A time for reflection?” [10.3389/fpubh.2018.00079](https://doi.org/10.3389/fpubh.2018.00079).)

The DPT vaccinated children died at 10X - yes ten times - the rate of the unvaccinated children. We are not talking about autism, allergies, or ADD. We are talking DEAD babies. But because this was conducted on the poor in Africa, a group left without representation, the research was swept under the rug never to be discussed publicly and certainly not acknowledged by doctors claiming to be experts in public health, pediatrics, immunology, or infectious disease. (As a side note, there are people that insist the reason we are seeing so much more autism today is because pediatricians and primary care physicians are trained better to recognize autism than they were 50 years ago. That has been completely disproven, as 50 years ago autism was about 1 in 10,000 children, today about 1 in 36. If we were simply not diagnosing them 50 years ago, even 25 to 30 years ago, why aren’t we finding all of those adult autistics in the nursing homes, assisted living institutions, or living with their elderly parents or siblings?)

These pro-medical-industrial complex doctors claim to be science based, require peer review in their positions, and demand real scientific debate until any information, such as this DPT study and the COVID-19 vax studies, proves their long held political beliefs are flat out false. Their criteria can never be reached when they immediately call such studies “blasphemy” and insist the authors be eliminated, the papers destroyed, and the information scrubbed from public view. This is reminiscent of the Tuskegee syphilis experiment done on black men by our own government, which was denied and covered up for decades, and the Willowbrook State School vaccine

experiments done on mentally disabled “volunteers” in which they were feed Hepatitis B infected feces to subsequently extract their serum Hep B antigens. In 1974, Purcell and Gerin used chimpanzee serum infected with human Hepatitis B to develop human vaccines. The HIV and Hepatitis B human experiments perpetrated by Alfred Prince included transfusing humans with chimpanzee blood directly under the umbrella of the NIH. I suggest one watch the brief video on hepatitis and HIV originating and research. <https://x.com/JoshWalkos/status/1802517740105674771>. Look up the actual US patents 4118478 and 3951937.

In another article (Rivers SL, Keeling M. A study of the incidence of Australia antigen and antibody in non-human primates. *Vox Sang.* 1970 Sep-Oct;19(3):270-2. PMID: 4993778), researchers actually did direct blood exchange experiments between chimpanzees and humans and then that human blood was used to isolate and make vaccines. Keep in mind, in regards to safety and being able to make sure the blood was completely free of primate viruses, all the latest viral detection technology necessary to ensure both did not exist in 1970.

The vaccine discussion is not unlike several other long-held contentions by doctors and other health care people who merely repeat the prescribed treatment protocols ascribed to them by their teachers, their hospital systems, employers, and of course, the TV ads.

Steroids, such as cortisone shots in arthritic joints, are common and “standard of care” treatments for painful knees, hips, shoulders, wrists, etc. Yet they have been proven to actually accelerate the degeneration of the joints and are no better than alternative therapies in relief of pain. Knee arthroscopic surgery to “clean up the meniscal debris” commonly performed by orthopedic surgeons for chronic degenerative knee pain has also been shown to accelerate the degenerative processes and is no more successful than conservative medical therapy. Yet, these procedures are insisted upon by “board certified” specialists for the treatment of patient ailments.

Anytime someone reveals the truth about a significant topic to include vaccines, border security, racism, climate, wind energy, pesticides, historical events, and so forth that counter the “accepted narrative,” he or she is labeled a term invented to disparage that person because

the disparager cannot counter the truth with any scientific validity. And so the name-calling begins: anti-vaxers, anti-immigrants, racists, climate-deniers, anti-progressive, anti-farmers, and conspiracy theorists.

Anti-vaxer and racist are the two favorite disparaging terms we hear from anyone in denial of the facts, the science, the data, and the reality in front of us. The public is terribly misled by the medical-industrial and military-industrial complexes, both of which I am intimately informed. Recommendations made to patients, to the public, and promoted on TV are about business marketing. The US spends more money on healthcare than any other country in the world, yet we have some of the worse health/disease statistics of any developed country.

The COVID-gate issue thrust upon the world in 2020, actually starting in 2019, has been a grand test by bureaucrats, power hungry politicians, and billionaire philanthropists in evaluating just how much they can get by with in circumventing our constitutional rights and getting people to comply via fear mongering and lies, all while excusing the perpetrators from liability and legal recourse. Fortunately, the truth is surfacing in various and many ways from published studies abroad to court rulings at the Federal level.
